**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cold on the fells in the very strong winds, especially gusty around any showers.

Forecast for Saturday 23 Dec 2023

Weather: Light rain expected for much of the day on Saturday with strong westerly winds continuing. The best conditions will be found in the east. Perhaps some drier conditions during the afternoon but remaining mostly cloudy and quite dull.

Maximum wind: Westerly 30-35mph gusts 40-50mph.

Chance of cloud-free hill tops above 800m: 30%, a lot of persistent low cloud particularly in the west.

Low cloud and visibility: Perhaps some cloud free tops during the morning but low cloud tending to form especially around western fell tops, becoming broken with bases above 500m. Visibility will be moderate or poor for much of the day.

Temperature: **Valleys:** Plus 10 Celsius.
At 800m: Plus 5 Celsius.
Freezing level: Above all summits.

Mountain Weather Forecast

Ground Conditions Supplement

Location: Birkhouse Moor summit 718m at 11:00 Full report: Thursday was similar to Wednesday, albeit with less rain but far stronger winds which was the main feature of the day. Indeed, the assessor erred on the side of caution (and common sense!) and turned back at Birkhouse Moor summit (718m) where the readings were taken. The cloud cleared occasionally giving a view of Helvellyn's summit and the Edges showing that no snow has fallen at altitude overnight. Thus, as far as walkers are concerned, the Lakeland fells and paths remain completely free from snow and ice. No snow at all was seen today but on Wednesday there were some isolated patches of snow above 800m at the top of steep north facing slopes. Owing to their location they represent no hazard to walkers. Even Helvellyn's large east face (frequently the last spot in the Lakes to hold snow) is now free of snow. Despite the milder weather in the valleys, the windchill (what the temperature actually feels like) at altitude remains below zero - minus 5 degrees C at 11am at 700m in the wind. Thus, full winter clothing (waterproofs, extra warm layers, hat & gloves), mountain boots and equipment including a torch, map and compass are all essential to safely, and enjoyably, roam the fells. For those interested in the stats, owing to the strength of the wind the assessor did not hang around the summit for very long and there were definitely stronger gusts to that recorded. Temperature: plus 4.9 C, Maximum wind speed 58.4 mph, Wind chill: minus 4.4 C, Average wind speed: 45.8 mph
